

## Testimonials

"As per me, this is a great initiative from TSNA and CAHO to educate/reiterate stakeholders about how essential Quality is in the Healthcare sector. The common myth that Quality is a cost (luxury) has been replaced by the principle that Quality is mandatory. I am sure that TSNA would continue partnering with all bright minds and keep on imparting the trove of experience and know-how. All the best"

The Certificate Program on Health Care Quality Management is an excellent program if one is looking forward to improving the safety and quality aspects in one's own area of practise in hospitals or any other health care sector. The course is very exhaustive and gives the participant an overview of all areas needed to improve quality and maintain standards to excel in patient care and safety. The Modules are carefully designed and serve as a ready reckoner, the faculties are great, they answer all your queries besides sharing their vast expertise in this field and the TSNA academic team are very helpful. I personally have learnt a lot from this course which is of short duration, very crisp and very informative, the projects given to us are very practical oriented and it was great to get inputs from the faculties during the presentation. We all seem to know but when we hear from the experts we find there is a lot more to improve upon, as it is said "Knowledge is power, Information is liberating, Education is the premise of progress". I wish this program a grand success.
